Scaling of the construction: time, and the machine-independent work behind it
a
Time against size (t = 2)
thinned Delaunay networks: edges^1.09 (1.07 to 1.10)
OpenStreetMap networks: edges^1.15 (1.05 to 1.27)
linear reference
construction time (s)
edges
b
Work per probe
nodes settled per probe
edges
c
Probes per edge
probes per edge
edges
