Measured traffic: certified constructions stay on the bound; uncertified baselines can exceed it
METR-LA (207 sensors, Los Angeles)
PEMS-BAY (325 sensors, SF Bay Area)
edges kept (%)
worst edge stretch over all 24 h
bound violated
requested stretch bound t
Delay-bounded (ours)
Union of per-hour greedy
Static free-flow
Mean-temporal
certified (filled)
not certified (hollow)
requested bound y = t
