Forced edges (Theorem 2) on city street networks at t = 1.5

Yazd (Iran, historic-organic)
forced 98.2% | removed 1.7%

Tehran (Iran, radial-grid)
forced 97.5% | removed 2.3%

Shiraz (Iran, hill-organic)
forced 95.7% | removed 3.7%

Melbourne (Australia, strict-grid)
forced 97.6% | removed 2.2%

forced: detour ratio > t (kept by any t-spanner)
removed by the construction
kept by the construction, not forced
