Forced edges (Theorem 2) on city street networks at t = 2

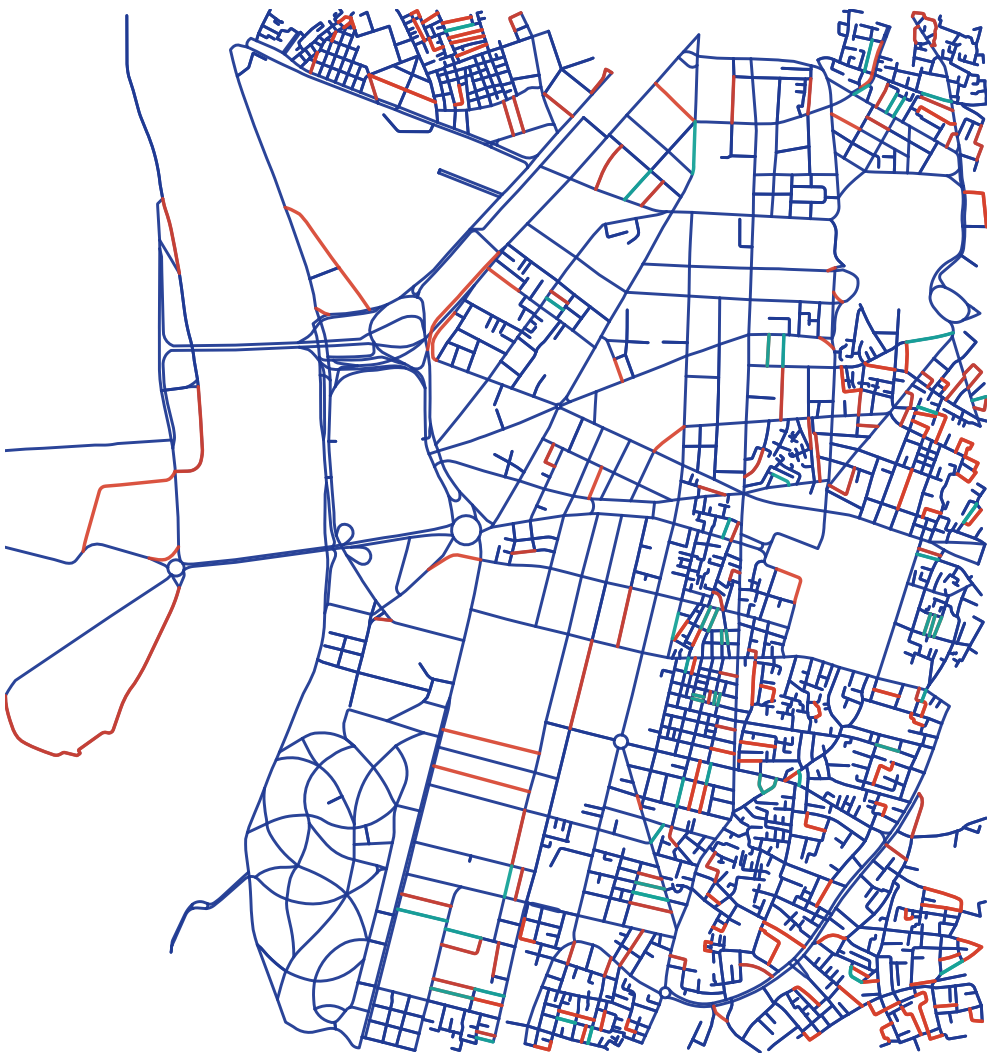

Isfahan (Iran, historic-organic)
forced 98.0% | removed 1.8%

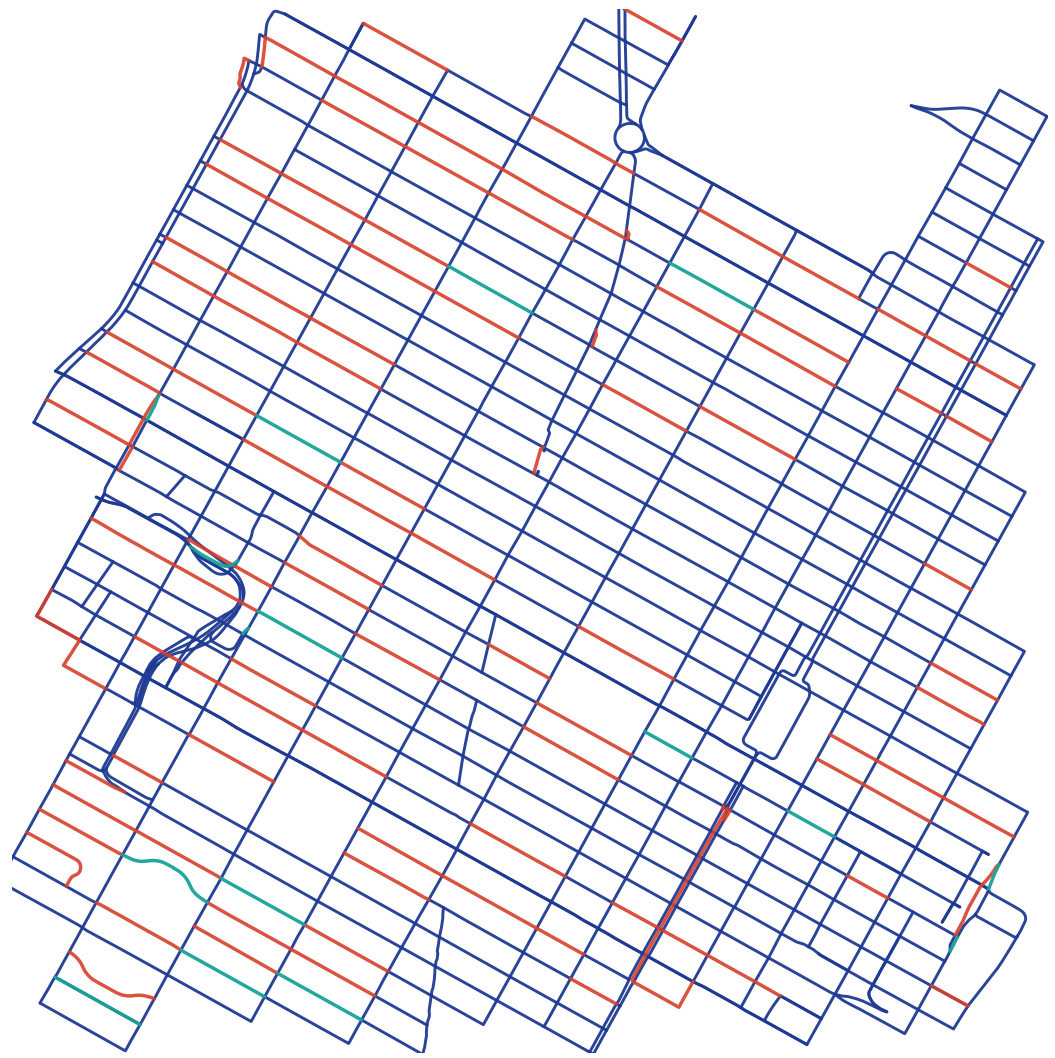

Tokyo (Japan, dense-organic)
forced 90.3% | removed 8.2%

Cairo (Egypt, informal-organic)
forced 94.0% | removed 4.9%

Manhattan (USA, strict-grid)
forced 88.6% | removed 9.9%

forced: detour ratio > t (kept by any t-spanner)
removed by the construction
kept by the construction, not forced
